

Double-Counting

Review the specific requirements within the degree programs for courses required in the major that will also fulfill general education requirements. With careful planning, students may select a course that fulfills both a general education and a major requirement. This is called "double counting."

Please Note: This is an efficient means of completing general education, but not always should students take this route. A student, a faculty, or a department, may prefer or require that students take courses that do not meet two requirements for the purpose of expanding the exposure to various topics.

Always check with your faculty advisor from your major to confirm if these general education requirements are appropriate for your particular degree

All majors: Engl 1101, 1102 and Comm 1101
