Mission

The mission of the Department of Anthropology is to research and teach about human behavior in a holistic and respectful manner. Anthropology consists of subfields that specialize in the human past, human biology and evolution, language, and bio-cultural behavior. Anthropology provides cross-cultural, international, and global perspectives on past and present human behavior. At Idaho State University, an important part of the anthropology mission is to apply anthropological concepts to the resolution of important social, cultural, and environmental problems of our times. The Department of Anthropology offers courses leading to the Bachelor of Arts degree and the Master of Arts or Master of Science degrees in Anthropology. For a full description of the M.A. and M.S. degrees, refer to the Graduate Catalog. The anthropology major provides training in all four subdisciplines in the field, including archaeology, biological anthropology, anthropological linguistics, and sociocultural anthropology. In addition, the department offers minors in Anthropology, American Indian Studies, Latino Studies, and Linguistics.

Undergraduate Learning Objectives And Outcomes

Program Objectives – Students who have completed an undergraduate major in Anthropology at Idaho State University should be able to:

1. Understand basic methods, concepts, alternative theories and approaches, and modes of explanation appropriate to each of the subfields of the discipline
2. Read and understand anthropological theory at an appropriate level.

3. Understand the use of quantitative and qualitative analysis in anthropological research.
4. Understand a comparative approach to the human condition, both cross-culturally and chronologically.
5. Demonstrate technical writing skills appropriate to education level.

Learning Outcomes – Students in the Senior Seminar will demonstrate the following competencies based on the above objectives:

1. Apply knowledge of anthropological methods, approaches, and modes of explanation to contemporary social issues.
2. Use theory to formulate a testable explanation for a given cultural behavior.
3. Select and perform quantitative and qualitative analytical techniques at a basic level.
4. Carry out a research project using cross-cultural or diachronic (or combination of the two) comparative methods.
5. Write a competent senior research project.
