# CLINICAL LABORATORY SCIENCE
## Applicant Evaluation

Enrollment in the Biol 411 Courses offered during the fall semester is limited by the size of the lecture room. We will cap those classes at 40 students total (20 students in Boise and 20 students in Pocatello). There is no cap at this point on on-line students for the fall semester Biol 411 classes. Each year, the availability of clinical experience sites and laboratory space in the second semester may vary. Every effort is made to schedule these clinical experience rotations during the summer semester, but because of limited space, from time to time it may become necessary to limit enrollment. Admission into the level II classes will be made only to those students who have successfully finished level I courses (C or better), unless prior permission has been granted by the program director. Students will be selected for slots in the Biol 411 II and summer clinical experience on the basis of the following point scheme. Applicants will be placed in order of their rank.
