

The following slides are adapted from student presentations. They demonstrate how simple graphics and clear, concise text can result in visual aids that are informative and easy-to-read.

# Crystalline Structure

The crystalline structure is the organization of atoms in a particular material.

# Various Imperfections Reduce Semiconductive Crystal Functioning

# *Nicotine enters the body...*

- Through inhalation into lungs
- Through use of smokeless or chewing tobacco

**Enters through skin and mucosal lining of mouth and nose**

**Takes only 10 seconds to reach the brain**
