

What is TIGER*i*?

This is the name of our university's enterprise resource planning (ERP) project. **TIGER*i*** powered by Banner, is a suite of web-based software products that **will bring all ISU human resources/payroll, finance, student, and financial aid information together in a secure, integrated, easy-access environment.**

What's Ahead?

BengalWeb & Human Resources/Payroll System Go Live!

- As plans currently stand, between fall of 2008 and the spring of 2009, all members of the ISU community will be able to begin using their new web portal, BengalWeb. The new portal will provide a secure, user-friendly entry point to give you access to campus electronic services and information.
- In January 2009, Human Resources/Payroll will go live in Banner. Online lookup of your payroll information will be available within BengalWeb. The Banner system will make it much easier to track and manage employee information and activities.

In the Future...

When the TIGER*i* system is fully operational, faculty will be able to access budget and expenditure data, manage travel requests, track purchase requisitions, and advise students with an online degree audit system plus much more. Visit the TIGER*i* web site—www.isu.edu/tigeri—to view the project timeline or to learn more about what's planned for the future or contact Cali Bell, communications coordinator at x.4446.
