

Get Ready!

Things to Do

Sept. 23

Change your ISU password.

Everyone must change their password, even those who have been forwarding their mail. After the upgrade on Oct. 6, any forwarding you had set up will have to be reapplied in Gmail. If you haven't changed your password, you won't be able to get any email sent to your isu.edu address.

As soon as you can

Clean up your old ISU email.

Organize. Get rid of messages you don't need. You'll be moving old mail to your new account. The less to move, the easier.

Oct. 5

Check Barracuda spam filter

(<http://barracuda.isu.edu:8000>). Make sure there's nothing you want to keep. On Oct. 6 Barracuda goes away and will be replaced by the Google spam filter.

Oct. 6

Go to google.isu.edu, and log on!

Try using Google Apps at ISU as your primary email service — consider forwarding your other email to your Google Apps at ISU account. However, if you want to re-enable forwarding, you must log in to Gmail to do so.

Your Google account contains new mail only. Outlook/Thunderbird users: Old mail left on the server will remain visible in your desktop program for a limited time. Webmail users: Go to <http://blade3.isos.isu.edu> to see old mail (also for a limited time).
