

Chapter

What are the conflicts between group and individual selection?

What are the four mechanisms/theories that explain cooperation and what does each say? p. 223

What is the distinction between altruism and cooperation according to cost benefit analysis?

How can cooperation evolve between unrelated individuals?

At what organization level should we study selection based on the information provided in this chapter?
There isn't a correct answer. This question is just food for thought.

Dolphin Paper

What aspect of dolphin cooperation was being studied in this paper?

How were alliances defined and how was relatedness determined?

Did relatedness impact alliance membership? What were the possible reasons for this?
