Deadline for manuscript
submissions:

20 June 2020

Message from the Guest Editor

Dear Colleagues,

A microbial fuel cell (MFC) generates electricity with the help of electrochemically active bacteria, degrading abundant, renewable organic matter, which can be environmental pollutants present in wastewater. Thus, MFC can be one of the sustainable energy generation systems of the future. Furthermore, MFC technology has evolved into other viable applications, such as removal of toxic substances, nutrient recovery, environmental quality monitoring sensors, and implantable health devices.

Since the discovery of microbial electrical energy over a century ago, MFC technology has made significant advances in energy generation and recovery. This Special Issue will focus on recent revolutionary MFC technologies in terms of biological and non-biological catalysts, construction materials, design, operation, and applications.

We look forward to hearing from you soon.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), Ei Compendex, Scopus and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 16.7 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the first half of 2019).
