ISU Microbiology Students Offering to Give COVID-19 Vaccine Presentations

ISU microbiology students, along with Professor Rhesa Ledbetter, are offering to give a presentation to students, faculty, and the general public surrounding the making of the COVID-19 vaccines and the science behind what it can and can't do to those who are vaccinated. The purpose of this is not to persuade the public or change opinions but to simply inform on the science behind what can be seen as a dark veil surrounding the vaccines.

If you are interested in scheduling a presentation for your club, class, organization, or business, please contact Chans Arce at arcechan@isu.edu.

Chair's Meeting Minutes
