

MATH & STATS degree programs now available for Idaho Falls students!

The Department of Mathematics and Statistics is working on making most of our undergraduate degree programs fully or mostly available to Idaho Falls and online students! Courses are offered via a blend of in-person Idaho Falls, Synchronous Online (SO), and Asynchronous Online (AO) formats.

B.S. - Artificial Intelligence Sciences (joint with Computer Science)

This degree is already fully available for distance students, with faculty in both Pocatello and Idaho Falls.

B.S. - Statistics

This degree is already fully available for distance students.

B.S. - Applied Mathematics

Students can complete this degree mostly online, having to commute to Pocatello for only 2-3 courses.

B.S. - Mathematics

While this is our most flexible degree, it is least available for taking via distance at this time. However, most lower-level, and some higher-level, courses will be available to online students.

Degree maps showing how distance students can complete our degrees mostly in Idaho Falls will be available soon.
