Testing and Practice Exams in Idaho Falls

The Idaho Falls Math 1108 students will take written exams. Each of the three 75 minute exams is on a Friday. Exam 1 is September 21, Exam 2 is October 26 and Exam 3 is November 30. The comprehensive Final Exam will be on Monday, December 10, from 3:00 pm to 5:00 pm.

Exam 1 will cover Units 1 and 2, Exam 2 will cover Units 3 and 4 plus 10% review material, and Exam 3 will cover Units 5 and 6 plus 10% review material.

The Final Exam will cover Units 1 through 6.

For each Unit, there is a Course Objectives Discussion for that Unit in the Course Objectives Discussion on the Math 1108 website www.isu.edu/math/math1108.

All exams include questions that specifically test the objectives given in the Course Objectives Discussion. So, after completing work in the individual lessons for a unit, take time to read the summary for that unit in the Course Objectives Discussion and answer all of the typical questions there.

For example, after completing the ALEKS topics for Unit 1, read the Objectives for Unit 1 in the Course Objectives Discussion, and answer the typical questions there. And so on.

Corresponding to each of the Units 1 through 6, there is an ISU-designed practice quiz. Specifically, Quiz1Practice covers the Unit 1 objectives, Quiz2Practice covers the Unit 2 objectives plus some review material from Unit 1, and so on.

There are also ISU-designed practice exams. Exam 1 Practice covers the objectives from Units 1 and 2. Therefore, Exam 1 Practice is a suitable practice exam for Exam 1. Similarly, Exam 2 Practice covers the objectives from Units 3 and 4, and Exam 3 Practice covers the objectives from Units 5 and 6. Lastly, the Final Exam Practice is a practice exam for the Final Exam.

After taking a practice quiz or practice exam, get help with the problems you missed so that you will be better prepared to do well when you take the written exam.

About one-half of each exam’s problems are eligible for partial credit. When you work a problem of this type on a practice exam, pay special attention to showing neat, organized work. Then when you come to a problem on the written exam that is eligible for partial credit, you will be better prepared to show the required neat and organized work.

The ISU-designed practice exams are very similar to the Idaho Falls written exams, and they help students transition from completing ALEKS topics to taking a written exam that covers many lessons.

The ISU-designed practice exams are of the same style, level of difficulty, and length as the written exams, and they test the same objectives.

You can check out the sample exams on Reserve at the Library. Ask for the Math 1108-Martin folder.
