OTHER CREATIVE / SCHOLARLY ACTIVIT

As Co-chair of the International Association of Orofacial Myology (IAOM) Board of Examiners (appointed position), rewrote the Objective and Essay written exams for IAOM certification in orofacial myology. Mary Ruma-Smith (Dental Hygienist from Colorado, my co-chair) and I led the Board of Examiners in this process, authoring the vast majority of the questions, conducting the research to assure sound foundation in the questions and answers, and developed the grading guides for the essay portion. Two completely new versions of both the objective portion and the essay portion were developed and approved, July 2020 –February, 2021.

Interprofessional Education Event with Department of Dental Hygiene (April, 2021); SLP students in CSD 6691 elective, *Orofacial Myology*, were grouped with senior Dental Hygiene students to teach each other about specific aspects of their expertise relative to OMDs (SLPs taught RDHs about assessment and effects of tongue tie, and RDHs taught SLPs about occlusion classification.)

Interprofessional Education Events with Department of Dental Hygiene (S17, S16, S15, S14); SLP Graduate students in CSD 6691 elective, *Orofacial Myology*, and senior DH students

in a Required Leadership Course discussed focus-questions on an assigned article re: interdisciplinary assessment of OMDs, and conducting screenings on each other, sharing relevant specialty knowledge from their professional training that overlaps professions in addressing OMDs.

Sabbatical, Spring 2010; Research for and writing of the exam for certification by International Association of Orofacial Myology (280 page document submitted to IAOM in July, 2010; Deemed a “pass” in October, 2010); Also taught one 3-credit class on campus during this period (i.e. modified sabbatical leave).

Traveling Interactive Exhibit, 2004: Developed “Small Talk”, an interactive exhibit to provide parents and young children (aged 0-4) the opportunity to engage in language rich interactions, and to teach parents about language development. The exhibit contains 6 large handcrafted wooden modules (ranging from 3 feet to 60 feet high), each addressing a different age group. The modules provide a traveling exhibit used in various public places in the southeastern Idaho region (e.g. libraries, health departments, hospital lobbies, family services agencies, etc.), exhibited on a rotating basis, to eventually be housed in a permanent facility as yet to be named. This work was completed with an SLP colleague, Sidena Bitton of Portneuf Medical Center and Bingham County Medical Center, via a Maternal & Child Health Grant procured by “Success by Six”.

Developed **parent publication** for “Success by Six” on Communication Development and how to facilitate speech and language growth with children from birth to four years. Spring, 2004.

Developed **Departmental Brochure**. Developed SLP Division brochure in its entirety and developed a “template” for all Divisions in our department to use for development of program specific brochures. Spring, 2003.

Interdisciplinary clinical teaching with Occupational Therapy department (Bill Gibson). Developed and implemented program wherein OT students were involved in the Communication Preschool and SLP students were involved in OT therapy in an interdisciplinary capacity with children exhibiting motor speech and/or speech + limb apraxia disorders. Fall, 2002-Spring, 2003:

Development of an award winning Interdisciplinary-Interagency Community Screening Clinic for Infants and Toddlers. Chair, subcommittee of the Pocatello CSHP Task Force charged with developing this clinic under the auspices of the AOpening Doors@ Grant directed by Utah State University. This committee of four developed and implemented a monthly clinic for 0-3 years olds to access free screenings of communication, motor, cognitive, hearing, vision, dental, and medical aspects. This clinic is provided by the goodwill service of Physical Therapists, Occupational Therapists, Developmental Specialists, Speech-Language Pathologists, Vision Specialists, Audiologists, Dental Hygienists, Nurses, Health Educators, and Service Coordinators from Portneuf Medical Center, Bingham Memorial Hospital, Idaho State University, The Idaho Infant-Toddler Program, the Southeastern District Health Department, and Idaho School for the Deaf & Blind. Nine to ten clinics have been held annually for the past 4 years. Continuation

indefinitely is planned. 1999

Development of an award winning in-office presentation for Physicians about the Idaho Infant-Toddler Program and the concept of the medical home. This work was done in a group effort by the Pocatello CSHP Task Force. 1999.

Development of award winning training modules, videos, and other materials to incorporate a child development and child disabilities training component into the curriculum of the Family Practice Residency Program at Idaho State University. This work was completed in a group effort by the Pocatello CSHP Task Force. 1999-2000.
