STRUGGLING TO CONTROL YOUR TYPE 2 DIABETES?

THE SURPASS-CVOT STUDY COULD BE FOR YOU

Do you have type 2 diabetes and a history of cardiovascular disease (CVD)? Are you aged 40 or above?

Then you may be able to take part in SURPASS-CVOT – a clinical research trial that will compare the effects of an investigational study drug against dulaglutide (an approved diabetes medication) on major adverse cardiovascular events, in people like you. Please contact the study staff to learn more.
