Environment

Volunteers lead grassroots efforts to protect the environment and strengthen understanding of environmental issues. They teach environmental awareness in schools and to local organizations, empowering communities to make their own decisions about how to conserve the local environment. Volunteers also address environmental degradation by promoting sustainable use of natural resources.

Relevant Coursework
Take three, 3 or 4 credit environment or conservation related courses taken as part of an approved science or engineering major or minor at ISU, such as the following:

- Geosciences
- Biological Sciences
- Engineering

For non-majors, speak with a PC Prep Advisor about relevant courses

Field Experience
Educating the public on environmental or conservation issues, or working on environmental campaigns: Conducting biological surveys of plants or animals; Gardening, farming, nursery management, organic or low-input vegetable production, or landscaping; Providing technical assistance and training in natural resource management; Urban garden projects; Work with organizations such as: Utah Conservation Corps, Idaho Conservation Corps, the Student Conservation Association, or an internship with local and state government offices focused on natural resource management.

Additional items to complete
- Two, 200 level Spanish or French courses or second language of choice
- Three intercultural/diversity courses or study abroad/away
- One significant leadership experience and resume critique at the Career Center
