Officially recognized by leading fire authorities

ISU’s A.S. and B.S. in Fire Services Administration is one of only a few university programs to carry the “Certificate of Recognition” from the Fire Emergency Services Higher Education (FESHE).

Quality
Excellent instructors with years of field experience.

Convenient
Earn your degree(s) online; attend class from home or the fire house.

Affordable
Out-of-state students pay in-state tuition for all Fire Service Administration (FSA) online courses. New Online Program Fee - only $250 per credit.

As a result of the rapid changes in firefighting and the leadership and management duties experienced in the field, academic degrees are being sought by those who have chosen firefighting as a career. Idaho State University’s Associate of Science and Bachelor of Science Degrees in Fire Service Administration (FSA) strive to enhance a student’s knowledge base as well as to prepare them for organizational leadership positions.

Degree Options
• Associate of Science
• Bachelor of Science

At A Glance
• General education courses do not have to be completed prior to enrollment in FSA courses.
• Courses do not have to be taken sequentially.
• All FSA core and non-core courses are taught online in a web-based classroom.
• If you have an A.A.S. in Fire Service/Technology you can articulate into the Bachelor’s degree program via our Fire Science Integration course (FSA 2299).

Program Requirements
• Students must complete 38 credits of general education courses in order to satisfy the degree requirements.
• Students will need a computer that has 20 MB of free disk space, a soundcard with speakers, a microphone or headset, and at least a 28.8 kbps internet connection.
