The Idaho State University College of Pharmacy received continuing accreditation at the June, 2007, ACPE Board Meeting. ACPE requested an interim report by April 15, 2006, which was accepted at the June, 2006, ACPE Board Meeting and a subsequent interim report was requested by April, 2008. The 2008 interim report describing the College's progress was reviewed at the June, 2008, ACPE Board Meeting. The report was to include a brief description of "the continued development of the space and other resources on the Boise and Pocatello campuses to support the needs of students and faculty." Detailed plans were included that are being reviewed under this focused site visit, especially the development of the Meridian facility. The Board accepted the interim report and determined the program met Standard 27, Physical Facilities, which was the area to be addressed. In addition, the accreditation status of the Doctor of Pharmacy program was affirmed. The Board requested we "submit a written report with a brief description of the progress regarding the development of the space in the Meridian building and how sharing the space with the Meridian Medical Arts Charter High School is working" by October 15, 2009. The next accreditation review to consider continued accreditation of the Doctor of Pharmacy program will occur during the 2010-2011 academic year.
