RPR 55C – QA Checklist UN2915 Type A Shipment by Public Highway

Shipment number: ______________

Shipment Date: _________________

Shipper: _______________________

1. _______. Ensure the material to be shipped does not meet the definition of any other hazard class and is not a hazardous waste.

2. _______. Ensure the packaging meets the USA DOT-7A Type A (49 CFR 178.350) specification and that test data and closure instructions are available.

3. _______. Ensure the radioactive contents do not exceed the A2 value for normal form or the A1 value for special form.

4. _______. If the material is special form, ensure that an IAEA Certificate of Competent Authority is available (49 CFR 173.476).

5. _______. If fissile materials (U-233, U-235 in enriched uranium, Pu-239, and Pu-241) are present, ensure the material is fissile excepted in accordance with 49 CFR 173.453.

6. _______. Inspect the packaging to ensure it is in good condition, especially gaskets.

7. _______. Package the material according to the manufacturer instructions.

8. _______. Perform a shipment survey on the package as specified in RS-19-08, Section 7.9.
    - The combined dose rate on contact with the package must be less than 0.5 mrem/hr.
    - The non-fixed contamination on the exterior of the package must not exceed the limits specified in 49 CFR 173.443(a), 7200 dpm beta-gamma per 300 cm² and 720 dpm per 300 cm² alpha.

9. _______. Mark the package in accordance with 49 CFR 172 Subpart D.
    - Proper shipping name and UN number (see Subpart D for size requirements)
    - Consignee’s or Consignor’s name and address unless the package will not be transferred from one motor carrier to another.
    - Gross weight and unit if greater than 110 lb.
    - USA DOT 7A TYPE A.
    - If the material is a hazardous substance (RQ fraction is greater than or equal to 1), mark the package “RQ”.

10. ________. Label the package in accordance with 49 CFR 172 Subpart E.
   - Determine the radioactive label category based on the shipment survey results.
   - Determine the radionuclides to enter based on the A2 fractions in accordance with 49 CFR 173.433(g).
   - Enter the total activity in the package in Bq multiples.
   - For Yellow II or Yellow III labels, enter the Transport Index (dose rate at 1 m rounded up to the next tenth).
   - Apply labels to two opposite sides of the package.

11. ________. Prepare a bill of lading for the shipment (49 CFR 172 Subpart C) using either the ISU form or the form for the selected carrier. Ensure the following information is present.
   - X or RQ in the hazardous material column
   - UN number
   - Proper shipping name
   - Hazard class
   - Number and type of packages
   - Radionuclide names determined based on A2 fractions and 49 CFR 173.433 (g)
   - For normal form material the physical and chemical form
   - For special form material the words special form are included in the proper shipping name.
   - The total activity in the package in Bq multiples.
   - The label category e.g. Radioactive Yellow II
   - For Yellow II or Yellow III labeled packages the Transport Index
   - If the package contains fissile radionuclides, “fissile excepted”.
   - Shipper’s certification 49 CFR 172.204.
   - Signature and date.
   - Enter your cell phone number for the emergency response number. Note you must be available 24 hours a day at the number until the shipment arrives.

12. ________. Provide a copy of the emergency response guide 163 to the carrier.

13. ________. If the label is Yellow III, provide radioactive placards to the carrier if they do not have them.
